## About Us

The founders of Higher Standards Home Health had a family member who had to have a total hip replacement and also had Alzheimer's disease. The family was unable to find a home health care company that was able to provide adequate care and compassion that met their high standards. Because of this, they set out to build an agency like no other to become your complete resource for wellness and health.

## Our Purpose

We are committed to a higher standard of the rehabilitation of aged, diseased, and/or disabled individuals within the structure of their home environments, allowing maximum contribution, independence, and retention of self-respect. We recognize the intrinsic worth of our aging community and want to help them regain maximum independence and participation in society. We believe the contributions of Our Seniors are no less important than the contributions of other members of our society. We recognize that the aging process is an unavoidable part of life and we understand chronic disease and disability may be part of that process. We enjoy providing care to individuals and we recognize that clients and their families have inalienable rights to self determination. We know there are many choices in Home Health Care, and we would be honored if we could be YOUR choice in Home Health Care.

## Our Services

We offer skilled and non-skilled services, which can be customized to suit each person's needs. They include the following:

- ✓ **Skilled Nursing**
- ✓ **Home Health Aide**
- ✓ **Physical Therapy**
- ✓ **Occupational Therapy**
- ✓ **Cognitive Stimulation Therapy**
- ✓ **Speech Therapy**
- ✓ **Medical Social Workers**
- ✓ **Nutrition Consultants**

**214-628-9047**

## How We Serve You

We will determine the ideal service that perfectly meets your needs and expectations.

- We work with your doctor, starting with the doctor's orders to evaluate and assess your condition.
- Together, we develop a plan of care customized to your needs.
- We begin with a skilled nursing treatment or therapy in your home with you at your convenience.
- We set goals for positive outcomes and healing.
- We evaluate throughout the program and make sure we achieve our goals.
- We maintain a communication with your doctor for updates and status until you are all better.
- We will file all claims to Medicare on your behalf so you are not bothered with confusing paperwork. You will receive statements from Medicare documenting our treatment plan.
- Home health care is a covered benefit provided by Medicare and is free to the beneficiary.
