

HIGHER STANDARDS HOME HEALTH

Getting *Better.*
Feeling *Healthier.*
Staying *Stronger.*

OUR VISION STATEMENT

Higher Standards Home Health was established in March of 2009 with the purpose of bringing quality, specialized services for patients within our community. With an idea and plan in mind, it took over a year to accomplish this goal. It was important for us to do everything correctly from the very beginning. We are a young company but with a strong desire to serve our community and deliver professional, quality services. The founders of this company had a family member stricken with Alzheimer's disease and a total hip replacement in the same year. We were unable to find a home health care company able to provide adequate care and compassion that met our high standards. Therefore, we set out to build an agency like no other. The decisions you make about your home health care may well be among the most important choices you make. Because you have chosen Higher Standards Home Health for your care, we value that decision and we will do everything in our power to make sure your experience and relationship with us is a friendly, meaningful, and caring one.

OUR SERVICES

We know how important it is to manage every aspect of patient care – from the patient's needs to the physician's recommendations. Every service we provide is closely supervised by our professionals and administered by the initial consultation up through the full recovery process. Our services help enable clients to remain in their homes, retaining their sense of pride and independence.

Our team of licensed and registered clinicians have been thoroughly trained to meet the challenges of their field and are required to attend continuing education classes to stay up-to-date with the latest changes, discoveries, and treatments in the medical field. Our associates LOVE what they do and are some of the most compassionate caregivers in Home Health care!

We conveniently offer skilled and non-skilled services, which can be customized to suit each person's needs. They include:

- ✓ Home Health Aide
- ✓ Medical Social Workers
- ✓ Nutrition Consultants
- ✓ Occupational Therapy
- ✓ Physical Therapy
- ✓ Skilled Nursing
- ✓ Speech Therapy
- ✓ Cognitive Stimulation Therapy
